DISCLAIMER

Nothing in the following list of links should be taken as personal statements about particular people or companies not involved in the lawsuit.

If, despite the clarity and verifiability of the information referred to, it is found that a report, conference, interview, documentary, article or image has been misinterpreted or erroneous, it will not change the facts or the empirical context of the truth and the basis of the lawsuit.

The following content is mostly in English and Spanish, with some in Italian and German, and some in another language (Portuguese, French, and even Polish, Russian, Finnish, Hebrew, Turkish and Chinese), although an attempt has been made to dub or subtitle everything, either into Spanish and/or English.

FACTS.

I) HEALTH DISTORTIONS-CONFUSIONS.

The actions promoted by the petrochemical industry from the 1910s to the present are overwhelming. Even more shameful is that the CDC and WHO continue to promote and sell a lot of this confusing and distorted propaganda to health professionals (who blindly believe their “colleagues” because they believe they act on principles). Since 1942 Conrad Hal Waddington spoke of epigenetics, and how THE “ENVIRONMENT” IS MORE DETERMINING THAN THE GENETIC INFORMATION ITSELF. But Hippocrates of Cos (460-370 BC), the “father of medicine”, had already said: <<the environment is everything>>, and Béchamp (1816-1908) ratified it, adding <<the germ is nothing>>. Hippocrates added that “NUTRITION” WAS THE BASIS OF HEALTH, as is nature itself, its elements and resources, <<maiorum>>, and that is SCIENTIFICALLY TRUE TODAY, as are the essential cofactors for someone to get sick (how is your immune system, because if you are sick, any nonsense could kill you, as in many countries where people die from a mosquito bite, this being nothing more than the catalyst and determinant of a series of serious previous problems). We have rights over our body, and the “environment” is Mother Nature (sun, water, food and air), the elements that Yahweh-God has given us <<ab aeterno.>> That is why it is written – in accordance with <<natura nihil frustra facit >> - that THE ELEMENTS AND RESOURCES OF NATURE WERE CREATED FOR OUR HEALTH (Genesis 9:3, Ezekiel 47:8-12, Mark 6:13, Luke 10:34, 2 Kings 5:10-14, John 9:6, Tobit 6:5, James 5:14, Revelation 22:2). But that is not promoted, but rather medications, because there is no interest in health but rather multi-million dollar agreements with multinational pharmaceutical companies. Then there is the culture medium (blood), which depends on this nutrition and on the “cellular signs-signals” (the chemical changes that emanate from the brain, and this from the emotions that produce the chemical changes such as the release of neuropeptides). However, Yeshua (Jesus of Nazareth) was absolutely right when he said that <<it is not what enters the mouth that contaminates-makes man sick, but what comes out of his mind and heart, that is what contaminates-makes him sick>>. This crude propaganda of “invisible enemies” that come from another person, are not scientific arguments nor have they ever been proven (they belong to urban legends promoted by the corporate industry).

II) MEDIA FRAUD.

An official Argentine report says that in mid-July 2020 (after 4 months of strict confinement), there were 2,200 deaths supposedly from the disease called covid-19 (average age of the dead: 80 years, and others with serious previous illnesses), in a country of 45 million anthropomorphic men (hereinafter “Adamics”, AKA “sons of Adam”). With such a low fatality rate, it is absurd to talk about a pandemic, even an epidemic. In the document “The elusive definition of COVID-19”, the author states that “the mortality rate is not a pandemic, it is a pandemic, it is a disease... of “pandemic flu” (Peter Doshi of MIT), published in the WHO Bulletin in 2011 Bull World Health Organ (2011; 89:532–538 / doi:10.2471/BLT.11.086173) clearly explains how the WHO changes the definition of a pandemic on May 4, 2009 (one month before the H1N1 pandemic was declared), removing

the element “enormous number of deaths and sick people”. On August 12, 2009, the journal 'The Journal Infectious Diseases' published the article entitled “What is a pandemic?”, written by David Morens, Gregory Folkers and Anthony Fauci, in which the authors relativize all the epidemiological aspects necessary for the declaration of a pandemic, except the “wide geographic extension” (widespread geographical extension), stating that this is the only common denominator.

According to data from the Ministry of Health, Spain recorded 3,853,511 confirmed cases of COVID-19 and 81,713 deaths between 2020 and 2023, and the COVID-19 mortality rate in Spain is reported to have been 2.11% in 2020, decreasing to 0.53% in 2022. That, as we said from the beginning, was lower than any other common disease, considering that a “case” (being sick) means nothing, just as having the flu is not a reason for your rights to be violated, nor does it mean that you are going to die. And if we remember that numbers were inflated, doctors and hospitals were paid to alter numbers, death certificates were manipulated, anything was reported as “covid” (which does not even follow Koch’s postulates), we are left with less than 7% of possible “real” cases (approximately 5,713 people). And of those 5,713 deaths, we must look at the cofactors, such as having been overcrowded, forcing them to swallow their own carbon dioxide, their own mites, their own oral bacteria, not having been allowed to go into the sea, get fresh air, sunlight, do physical exercise, being subjected to fear, not connecting with their loved ones, having been injected with poison, or having had previous health problems. Thus, the rate is considerably reduced, demonstrating that the State of Alarm was a political and corporate invention.

III) DEATHS.

Infected, or “case,” does not mean dead or in danger of dying. On the website of the 'Ministry of Health of Spain', one searches for “severe pandemic,” but finds that as of November 20, 2020, 328,499 people would have died, but by the same date in 2019 (the previous year), MORE PEOPLE HAD DIED. The INE (National Institute of Statistics), for example, said that in week 41 of 2020, there was a cumulative total of 384,618 deaths; while in week 41 of 2019, there were a total of 326,801 deaths. That is a difference of only 57,817 deaths, and these fit perfectly with: 1) those who died in nursing homes due to the negligence of their caregivers (who were afraid of “contagion”, inoculated by the media), 2) suicides due to economic desperation (due to the closure of their business, or the ERTE of the company where they worked and not being able to make ends meet, not even with state aid, which in many cases did not arrive in time), or 3) chronic and serious pathologies: these have nothing to do with COVID-19, and were postponed due to an alleged collapse of the health system; the late detection of serious illnesses because, as all medical care was by telephone, it was impossible to detect it in time. This, in short, causes deaths, which, in any other health situation, could have been avoided. But if one wants to see alarming deaths, count how many people died from being intubated (automatically blocking their respiratory capacity). Of these real “dead”, the Weekly Epidemiological Bulletin of Aragon had already explained that 63.1% were people in the age group over 65 years (people with a propensity, who could have fallen in the same way with a strong flu if it was not managed), without taking into account that the vaccines given to the elderly in nursing homes are specialized for their

high dose of the dangerous Polysorbate 80. According to the Italian Higher Institute of Health, 96.3% of the presumed deaths from Covid died from other pathologies.

IV) CASES.

The “media” kept repeating the word “cases,” as if they were “new cases.” What is a “case” in medical language? According to the RAE, it is an “individual morbid process, especially of an unusual kind.” What is so strange about flu symptoms, or fever, or known types of pneumonia? Is the use of corrupt language necessary to manipulate the minds of the masses? The CDC reportedly inflated COVID numbers by as much as 1,600% and is accused of violating federal law.

V) CONTAGION.

Technically, contagion is said to be the transmission of a disease, usually infectious, from one individual to another. Apart from the fact that this doctrine has not been demonstrated, being infected with something does not imply an alarm, much less a reason to violate people's rights. How many times do most people get sick in a year? Haven't illnesses and diseases been with us since men have existed in this world? If we start from that point of assumption, we should live locked up and disconnected from each other. But it is said that diseases are “transmitted” from one person to another. That is SAID, but what about the evidence? First they would have to give us irrefutable proof of a bug - *exempli gratia*, the “flu” -, show that a sample has been “captured”, and take a photograph of it with a microscope. Other people would have to do the same to make sure that there are no errors or manipulations; then they would have to film the journey of the empirical object from one host to the next “victim”, and see how it enters their body. Since this HAS NEVER HAPPENED, the story of “contagions” should be labeled as an urban legend, not a scientifically proven fact. Most individuals are cured or become ill by mere suggestion, by placebo or nocebo effects (we somatize ailments and pathologies permanently, due to the psycho-emotional processes we go through, because the mind ends up crystallizing-solidifying its emotions), due to poor nutrition, previous poor health (a weak immune system), or general epigenetic reasons.

VI) VARIANTS.

Among the different meanings of the term, a variant would be a <<Variety or difference between different classes or forms of the same thing.>> (RAE) Supposedly, tiny bugs (those viral ghosts) were being found and analyzed in laboratories. If you can see them in a laboratory, then you can take a picture of them, right? Where is it? 99% of the images shown are made by computer, they are digital recreations. On one occasion, someone tried to present a “real” image, being something blurry that nobody knows or even understands what it is, and that looks like something else. But what is it that “varies”? What has been studied, coming from vaccinated people, is that they have been injected with serious things (proven by the VAERS testimonies), which do have the characteristics of what is so promoted. This is not some imaginary creature that travels through the air from China and enters your cavities: it is something created in a laboratory and injected into the population with vaccination campaigns, and even sprayed into the air from airplanes and introduced into running water and food. This bug, which resembles a spike protein, has parameters for

tuberculosis and HIV (another experiment created in military laboratories as reported by the American naval intelligence officer Milton William Cooper in his documents sent to the American Senate in 1989, and in his 1991 book 'Behold A Pale Horse '). Indeed, that could change, because that is what it was designed for, and it continues to mutate inside vaccinated people.

VII) PATTERN-CALENDAR-GUIDELINE.

Much of the population was manipulated by being told that they should take the "full schedule" of vaccinations, and do so within months of each other. This is done with gene therapies, not with a vaccine. The idea of a vaccine is to inject you with a poison coated with living human material (in this case from the kidney of an aborted baby, so that the recipient's DNA does not reject it or attack it as an unknown agent). Although not all vaccines are the same, they all follow some elementary bases, and the poison that they inject you with must come from the material that you want the organism to know, but in small quantities. Thus, your DNA already knows it, and if it attacks it, it would have created antibodies against it. But if the organism per se does not exist, they are poisoning you in vain, and you also do not know how much poison they are putting in you, which, in short, DESTROYS YOUR IMMUNE SYSTEM. Therefore, poisoning someone in vain once is one thing. But multiplying the poisoning, again, doubles the danger of that poison, further exhausts your immune system and reduces your life expectancy. But if you get a third one, what will you do? But there were people who were injected 4 times and, in addition, a so-called "booster ". I don't know if they are still alive, but their life expectancy was shortened by less than 10 years, apart from the fact that the Cas9/ Caspr – included in the vial – is eating away at their DNA (cutting the DNA chains) with each passing day.

VIII) OUTBREAKS.

They told people to lock themselves in, and it didn't help them at all [positive]; they told people to put scars on their faces, and it didn't help them at all [positive]; they told people to inject themselves with this poison that seemed like a "miracle potion," but that didn't help them either [positive]; they told people to keep a minimum distance of 1.5 meters, but that didn't help them at all [positive]. They were like a group of cows driven from here to there escaping the flu under premises based on urban legends. But, to top it off, they continued to instill fear and terror in them - and even a feeling of guilt, for hugging their loved ones, going to a party or playing with their friends - saying that the invisible monster mutated, and reappeared anywhere. It was enough for people to have any pathology, illness or discomfort, to invent that there was a new outbreak. It was the never-ending story, based on air and fantasy. But it served to indoctrinate many people to fear repression, to continue wearing muzzles, to fear getting sick (something that is a natural cycle), to rush to inject themselves with any poison - to enrich the sellers of spells - as soon as there is talk of a new invisible enemy, to launch legislation to continue promoting a global dictatorship, to continue eliminating fundamental rights, to continue damaging the economy and to continue deceiving in matters of health (because it is a business, and a cured person is a lost client).

IX) PSYCHOTRONIC DANGER.

The Institute of Electrical and Electronics Engineers (IEEE) C95.1-2005 standard states that a maximum power density of 10 milliwatts /square centimeter is the maximum power density one should be exposed to (for 9 minutes out of every 24 hours), and 8 microteslas of antenna emission, but this is not the case for 4G plus, 5G or 6G, which reach more than 300 microteslas . When you have the smartphone glued to your head, the power density is 16 times higher than that recommended by the IEEE, but the power of the antennas **INSTALLED DURING THE QUARANTINE (NOT A COINCIDENCE)** is much higher. And the same effect occurs when the temperature is raised (thermal and biophysical responses, like anything inside a microwave), both by the destruction of water molecules, and by the body's reaction to the irritation of the cells, which, believing themselves to be attacked - although they do not see an enemy, because they only perceive the waves - raise the body's temperature as a natural defence measure to destroy by heat what they believe they do not know is not biological. The European Union has received more than 300 studies on the dangers of this microwave and radio frequency technology, but has categorically ignored them. Already in a study by Steven Weller (BSc Science from Monash University) he conducted a study on what is called EHS (Electromagnetic Hypersensitivity) published on November 27, 2013 (it was common), and he commented: <<People living within 100 meters of a wireless facility of any kind tend to report symptoms such as dizziness, nausea, memory loss, inability to concentrate, irritability, increased blood pressure, peculiar pressure behind the eyeballs, joint pains that move throughout the body, pain in the soles of the feet, high-pitched noises in the ears, itchy systemic rash, and even internal bleeding - all symptoms of radio wave sickness.

Clinics report an immediate increase in respiratory illnesses: bronchitis, influenza, pneumonia and asthma during the first weeks of PCS base station deployment and hospitals are flooded.>> Microwave syndrome: A preliminary study in Spain (epidemiological study), summarized the same: <<Insomnia, cancer, leukemia in children and brain tumors are the most frequently described clinical entities (Dolk et al., 1997; Hocking et al., 1996; Maskarinec et al., 1994; Minder and Pfluger , 2001; Selvinet al., 1992). Furthermore, the clinical consequences of exposure to microwave radiation such as radar have been evaluated from military and occupational studies (Balode , 1996; Garaj-Vrhovac , 1999; Goldsmith, 1997; Johnson- Liakouris , 1998; Robinette et al., 1980). A specific symptomatology, related to exposure to radar at low RF levels, has been termed "microwave sickness" or "RF syndrome" (Johnson- Liakouris , 1998). With few exceptions, functional disturbances of the central nervous system have typically been described as a kind of radio wave sickness, neurasthenic or asthenic syndrome. Symptoms and signs include headache, fatigue, irritability, loss of appetite, drowsiness, concentration or memory difficulties, depression and emotional instability, actually reversible if RF exposure is discontinued. There is a large and consistent body of evidence of biological mechanisms supporting the conclusion of a plausible and logical causal relationship between RF exposure and neurological disease.>> This is why Putin ordered all 5G antennas in Russia to be dismantled, and why the people of Israel (a country focused on technological development) are reluctant to install 5G technologies (having accepted only a few operators transmitting 3.5 GHz).

Psychotronic weapons are a technological resource of the state corporation to fire modulatable waves that adjust to the brain waves of the individual, to use this modulation for psychological purposes (each thought emits a specific wave at a frequency, and by artificially modulating that wave, thoughts can be manipulated). In this way, a State can maintain a state of widespread panic and fear, and perpetuate the obedience and inaction of the masses. This is already being done with CIA programs like MK-Delta, and even has patents (such as US 06506148 B2, 607302a or US 5,782,874, 5,899,922, 6,081,744 and 6,167,304, or numbers 5,935,054 and 6,238,333 (pulsed magnetic fields), US 5,800,481 and 6,091,994 (weak pulses of heat applied to the skin), or US number 6,017,302 (subliminal acoustic pulses)). Dennis M. Bushnell, former head of NASA, had already described in 'Future Strategic Issues / Future Warfare ', that by 2025 they would have implemented all kinds of technologies and resources in a war to take away humanity's rights and be <<in integrum >> controlled. But it is well known that geoengineering has been used since the 1970s (as it was initially done in the Vietnam War), and "curiously", before 5G began to be installed - and in parallel and after its installation - after seeing some apparently unnatural condensation trails left by certain planes, people began to cough and have "viral symptoms". The compounds in these "contrails" have been studied and, evidently, they are not condensation contrails but chemical compounds deliberately sprayed on the population, containing barium (67.8 ppm), aluminum (3090 ppm), lithium (507 ppm), zinc (58.9 ppm), copper (55 ppm), cadmium (54 ppm), lead (53 ppm), silver (28.3 ppm), sulfate (22 ppm), silica (8.67 ppm), mercury (1.06 ppm), graphene oxide, morgellons , and even anthrax, among others. But anthrax is not only sprayed from airplanes, but is also released in oil pipelines – together with high amounts of fluorine – and is sprayed on food and soil (especially caesium-137, strontium-90, uranium residues, thorium-230, radium-226 and radon-222, among others). These components - mostly heavy metals - as found in various studies in water, food, the body and air (when only sprayed), serve to triangulate and MODULATE ONE'S OWN MENTAL PROCESSES BY THE WAVES AND FREQUENCIES OF CERTAIN ANTENNAS, SATELLITES AND other devices.

X) PRESUMPTIVE VACCINE

The so-called "vaccine" WAS NEVER APPROVED (it was rejected by the FDA). It did not pass safety tests. It was not proven to be safe or effective. It was never isolated, sequenced or purified. It did not pass animal testing <<in anima vili >> (they all died). To date, not a single microscopic photograph of it exists. It is known - scientifically speaking - that such vaccines cancel Syncytin-1 and Syncytin-2 by means of the spike protein , responsible for reproduction. In fact, the supposed genome of sars-cov-2 is nothing more than a copy of the syncytin genome (because everything that attacked the supposed " covid " was intended to do so against " syncytin "). All vaccination campaigns since the 1910s have been agendas to make people sick, so that the pharmaceutical industry has permanent customers. And since the MKNAOMI project, these strategies have been used for sterilization. The insistence that people inject themselves with " boosters " and new "doses" shows that they were not vaccines (because one is enough), but a gene therapy with mRNA that sought the hybridization of SP2 with DNA, also coating the cells with graphene oxide permanently. All these companies (PFIZER, MODERNA, ASTRAZENECA, etc.) are only the representative face of those who really create the vaccines: the military laboratories.

The nanotechnology there comes from DARPA, an agency of the DoD itself . The real “feared virus” was always in the vaccine. But if anyone believes that such vaccines have been created to improve health – and not to cause the diseases of the 20th and 21st centuries – think again. Between 1955 and 1963, almost 98 million Americans received one or more doses of the “anti” polio vaccine, which contained the cancer virus called SV40 (Simian). (Vacuolatin 40). HIV was created in US military laboratories and introduced into Africa via the smallpox vaccine in 1977 – as was done with tuberculosis – and then infected the US population in 1978 using the hepatitis B vaccine. The swine flu vaccination program was designed as an attack on Cuba, and was proven dangerous (but after 45 million Americans had already been vaccinated), causing Guillain-Barré syndrome. The so-called “Spanish flu” of 1918 was the side effect of the US vaccination campaign of that year (which is why soldiers, first in line for vaccination, died unrelated to the war, while unvaccinated civilians had 4 times lower mortality and disease rates).

The millions of people who injected themselves with this poison - many of whom are close to me - unfortunately did not know what they had been injected with: vanadium, iron oxide, titanium, bismuth, hydras, trypanosome parasites, graphene hydroxide (patent CN112220919A), synsitin -blocking mRNA , Cas9/ Crispr (a protein that cuts DNA), SM102 nanocrystals , HIV, organ fragments - such as kidneys - from aborted fetuses, TLR receptors, Polysorbate 80 solvent, SPION (magnetizing graphene oxide nanoparticles). In short, most of what the vials contain is NANOTECHNOLOGY. Apart from this, ASTRAZENECA wax-ins have ChAdOx1-S (a recombinant chimpanzee adenovirus); PFIZER-BIONTECH's also contain tromethamine , 4-hydroxybutyl, azanedil , as well as hexane-6 and 1-dii lipids; along with 2-hexyldecanoate; also polyethylene glycol, N- ditetradecylacetamide , 2-diesteraroyl-sn-glycero-3-phosphocholine, potassium chloride, potassium monobasic phosphate, among many other POISONS. This is why so many athletes are dropping dead as if from sudden heart attacks, and so many people are experiencing accelerated illnesses, even the onset of AIDS and blood clots in their cells. Not to mention that since 1915, ALL vaccines contain mainly heavy metals, starting with mercury and aluminum, as well as beta-propiolactone , gentamicin sulfate and polymyxin B, genetically modified yeasts, animal, bacterial and viral DNA, monosodium glutamate, formaldehyde, animal and human cells (which conflict with the recipient's DNA), noomycin sulfate , phenol/ phenoxyethanol and polysorbate 80. That is why autism cases have increased more and more and cancer has proliferated.

XI) THE MAFIA.

Do you know what EP3172319A1 is? A GOOGLE patent from 2014, registered at the European Patent Office by the Pirbright Institute , relating to “CORONAVIRUS” USED AS A “VACCINE”. This vaccine was not created to defeat a chimera virus, a chimera virus was created to be introduced through a vaccine, both to sterilize the population (to reduce the world population: BILL GATES HAD ALREADY SAID THIS ON TED IN 2010, <<AD LITTERAM>>) and to leave nanotechnology elements attached to the DNA of survivors that will be used in later agendas. The corpse-prayer in charge of such vaccines is COVAX (a section of GAVI, the global vaccine alliance), owned by Bill Gates (main financier of the

WHO, shareholder of PFIZER-BIONTECH, promoter of the ID20202 project (a quantum dot tattoo to realize the self-fulfilling biblical prophecy of the “Mark of the Beast” (patent WO/2020/060606)), and whose company Microsoft patents vaccines), the same Gates - whose grandparents created and promoted the vaccine cocktail received by American soldiers at the beginning of World War II and which was later said to have caused the “Spanish flu” - who in 2010 publicly said on Ted that if they did a good job with vaccines they could reduce overpopulation. This is the same Gates who was a college roommate of Antony Fauci (the first director of the vaccine company MODERNA, a company that during World War I was known as IG Farben (the largest German chemical cartel), but was renamed MODERNA by the main sponsor of globalism, George Soros, and financed mainly by Jeffrey Epstein). And Gates and Soros own the British company MOLOGIC, intended for supposed “ testing covid ”, all leaving and returning from the same place, like the ouroboros (dragon biting its tail). These same Soros and Gates with their foundations (Open Society and Bill & Melinda Gates) are the main financiers of the IFCN (International Fact-Checking Network), blockers of truths through all networks, also supported by their alliances with GOOGLE. So, cui bono?

David Fleming (CDC’s Deputy Director for Public Health Sciences) joined the Bill and Melinda Gates Foundation in 2003 as director of the Global Health Strategies program, and the Bill and Melinda Gates Foundation has provided funding to the CDC Foundation, an independent nonprofit that supports the work of the CDC (in 2003, the Gates Foundation gave \$13.5 million to the CDC Foundation). In addition, in July 2018, the executive director of the state-run organization SPAIN, Pedro Sánchez, received Soros privately at La Moncloa, and Spanish researchers know that Soros was behind his presidential campaign. Soros has been described as a key player in Spanish politics, with the ability to influence government decision-making. His organization, OSF, has funded more than fifty NGOs working on political and social issues in Spain and around the world. Soros has funded several organizations that have links to Catalan separatism, such as Ómnium, Irídia , Novact and the Institut de Drets Humans de Catalunya. These organizations have received grants from public funds and from the Open Society Foundations (OSF), founded by Soros. The CNI (National Intelligence Centre) of SPAIN considers Soros one of the main threats to the country, due to his influence on illegal immigration –both in SPAIN and in the rest of EUROPE- and on Catalan separatism.

Others are responsible for demanding justice against the crimes caused by Gates, Soros, Rothschild, Rockefeller, Fauci , Adhanom , the WHO, CDC, FDA, DARPA, MODERNA, PFIZER, ASTRAZENECA, CANSINO, SINOVAC, SPUTNIK, etc., up to the biological laboratories of WUHAN (owned by GLAXO, a company that in turn owns and is the majority shareholder of PFIZER). But it must be known that the Bush family is also a majority shareholder of PZIFER (as it is of the pharmaceutical company Bristol-Myers Squibb and the pharmaceutical laboratories Abbott, which manages the finances of BLACKROCK, which manages those of Soros’ OPEN SOCIETY). How many coincidences! They themselves negotiate with AXA, with which the German company WINTERHUR built the Chinese laboratory in WUHAN (which implicates Anthony Fauci , according to emails he was forced to reveal in early June 2021). Unfortunately, 91% of the European Medicines Agency’s budget is financed by these same lobbies (AZETRASENECA, PFIZER, MODERNA...).

However, giving it reasons to supposedly "care" about the people by causing us this harm, would be like considering that the Nuremberg trials were unnecessary - since Hitler's reasons would have been logistically and culturally correct - or that Pharaoh Seti I had the right to order the drowning of the children of Israel because there were too many of them and they posed a theoretical threat to Egypt (remember Exodus 1:22, the Torah). There are other lawsuits, and there are precedents, such as that of Jane Burgermeister, the Austrian journalist who filed a criminal complaint against the FBI, the WHO, the UN, the United States government and various public health organizations such as the FDA, as well as against several medical and pharmaceutical laboratories, on the accusation of creating flu pandemics and then massively administering dangerous vaccines to the entire world population. On June 10, 2009, she accused these organizations and their representatives of committing several serious crimes related to bioterrorism, attempted genocide, mass murder, high treason, etc. This complaint is added to another filed against the companies Baxter AG and Avir Green Hills. Biotechnology for producing a contaminated batch of swine flu vaccines, alleging that both companies intended to manufacture a virus and profit from it.

XII) MUZZLES.

They had to be worn so as not to "cough" on other people (as if we were so rude not to cover ourselves or turn our faces when coughing), or to avoid inhaling "vampiric" "particles", the kind that could supposedly resist sunlight for hours. This face diaper is supposed to protect the mucous membranes of the nose and mouth, and why not those of the eyes or ears? Or the skin? Can't these tiny "ghosts" pass through the pores of the skin? But you had to wear a piece of diaper on your face, and do so against a supposed "lethal virus" (with an extremely low mortality rate), when for more trivial things full masks and suits with waterproof gloves are used. But that's how "lethal" - sarcasm - these microscopic "elves" were that were talked about so much, and that nobody really saw or documented (except in the components of vaccines). These muzzles are not intended to protect against pathogens with a diameter less than 200 nanometers. They merely help, at best, to prevent the ingestion of dust, external mites, pollen or other particles up to 100 microns. In reality, scientifically speaking, they are simply HYGIENIC in nature so that the health professional does not spit on his patient. They are used once and thrown away. THERE HAS NEVER BEEN EVIDENCE THAT A PATHOGENS - LIKE A PRESUMED SARS-COV-2 - "TRAVELS THROUGH THE AIR", or even that it resists exposure to the sun or can survive outside a living environment - like the outside of a body - while supposedly deliberately "jumping" from one organism to another. A pathogen with such characteristics would have had to be designed in a laboratory (from which it is IMPOSSIBLE for a chimera to escape (given its multiple and detailed security systems) -, and its fatality rate would have been such that today we would be on the verge of extinction as humanity. They even blamed the Chinese, saying that they released such a thing on purpose, as if they were idiots to commit such an act of suicide (having been the first country with suspected cases and the first to return to normality and one of those in which this caused the least problems).

XIII) SWABS.

In November 2020, Johns Hopkins University (JHU) published a study suggesting that test swabs may carry “tiny star-shaped micro-devices ” capable of delivering vaccines to people with or without their knowledge (which is why they were pushed so deep, rather than just taking snot from anywhere in the nose). These tests are so fraudulent that 80% naturally give false positives. THEY HAVE BEEN TESTED ON PAPAYAS, GOATS, COCA-COLA DRINK, RED BULL DRINK, AND EVEN TAP WATER, AND THEY ALL CAME POSITIVE. These tests have become contaminated and no longer show exposure. The rapid or serological test does not detect a virus directly, but rather identifies the IGG and IGM antibodies present in our blood when we get sick. IGM refers to recent exposure to the virus, while IGG refers to past exposure, i.e. when you are already cured. IGG is an antibody that you produce against a family of viruses. That is, they are tests that give false positives, and, to top it off, they are used to confirm each other. And although the signature of inflammation should appear, it is nowhere to be seen. And with all viruses a confirmatory test is done, something that was not done with the so-called ghost, the invisible enemy, the demon of COVID. Since there was no quantified viral isolate of 2019-nCoV available for CDC use at the time the test was developed and this study was conducted, assays designed for the detection of 2019-nCoV RNA were tested with characterized strains of in vitro transcribed full-length RNA (N gene; GenBank accession : MN908947.2) of known titer (RNA copies/μL) added to a diluent consisting of a suspension of human A549 cells and viral transport medium (VTM) to mimic a clinical sample. This was then processed with computer numbers, completing a human-like sequence, which was presumed to be a virus. Put another way, since such a virus was never isolated, purified or sequenced, neither PCR nor vaccines make sense - they were a PREMEDITATED and PREDESIGNED invention.

In fact, the “biosecurity” materials of PLAN-DEMIA had already been purchased by the US and Europe from China for years, through the World Bank, already labeled for “COVID-19” (called: “Covid-19 Diagnostic Testing Instruments and Apparatus” (300215 in 2017 and 902780 in 2018)). It was all planned since 1989 by the Rockefellers, and in May 2010 the Rockefeller Foundation and the Global Business Network issued a report entitled “Scenarios for the Future of Technology and International Development”, laying out and predicting a future scenario of alleged pandemics (among others), with the need to implement consequent actions (population control), also known as Operation LockStep . And two months before China launched its propaganda campaign, the media were already ready to do their propaganda work: on October 18 [2019], at the so-called “Event 201” at the Pierre hotel in New York, organized by the Johns Hopkins Center for Health Security, in collaboration with the IMF and the Bill and Melinda Gates Foundation. And a few days later (on October 29) the Milken Institute did the same .
